

"Show Horse" Mixture

Formulation:

- Tekapo Orchardgrass
- Duo Festulolium
- Tonga Tetraploid Perennial Ryegrass
- Tuukka Timothy
- Kentucky Bluegrass

Applications:

- **Show Horse** is formulated with grass varieties selected for the close-nip grazing of horses. It is a mix of highly palatable varieties that make super quality forage for horses.
 - **Show Horse** can also be used for hay.
- Excellent persistence even under close grazing
 - Excellent season long forage
 - Very high forage yield
 - Top choice for grazing or hay

Tekapo Orchardgrass and **Duo** Festulolium provide good summer growth with high quality forage parameters. **Tonga** Perennial Ryegrass and **Duo** Festulolium are two high-energy grasses that perform well in spring and fall. **Tuukka** Timothy exhibits additional summer growth over most timothy varieties and is very winterhardy.

Seeding Rates:

Seeding Rates for a new pasture or hay field should be 35-50#/acre.

Method of Seeding:

Use of a Brillion seeder, a no-till drill or a culti-packer is ideal. Soil to seed contact is vital to having a successful stand. Plant the seed ¼" deep.

Each of these grasses needs proper management on initial grazings and weed control to offer the best pasture.
